

## ANTIFYRE HOSEREEL SERIES

Antifyre's range of hose reels combine high performance and a rugged space saving design. Manufactured without compromise the Antifyre Series is renowned for its quality and long-term reliability derived from cutting edge technology and world-class production.

Antifyre Series hose reels are available in manual or automatic versions. Manual versions are fitted with a ball or a gate valve. The automatic format actuates as the reel is rotated removing the need for the user to turn on the water supply – an important safety consideration. All models are with 30metres of 19mm bore hoses.

The range includes fixed and swinging variants. Swinging hose reels are available in right and left hand formats suitable for surface or recess mounting.

## FEATURES
